

RESP^{POINT}INT

Face Recognition & Cellular Analysis

TRADITIONAL IDENTIFICATION METHODS CAN NO LONGER MEET MODERN SECURITY DEMANDS

5.8B+ MOBILE USERS WORLDWIDE

Mobile devices have become an essential part of modern life, connecting nearly three-quarters of the world's population.

MASSIVE VISUAL DATA

Large volumes of surveillance footage are difficult to analyze manually, increasing the risk of missing critical identification.

BILLIONS OF SIGNALS GENERATED DAILY

Every connected device continuously exchanges data, creating a vast and dynamic landscape of mobile activity.

NEED FOR REAL-TIME FACE RECOGNITION

Security operations require instant and accurate facial identification to enable faster, data-driven responses.

IDENTIFY FROM FACE. TRACE FROM CELLULAR.

HOW RESPOINT WORKS: FROM FACE TO VERIFIED IDENTITY

CAPTURE FACE

01

Acquire facial images from CCTV, body cameras, or uploaded photos.

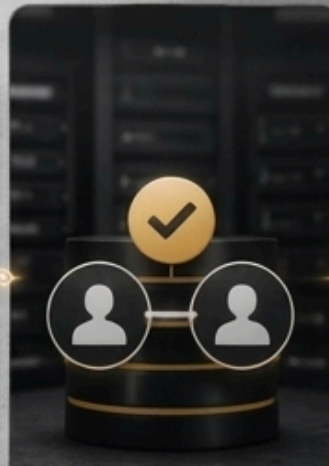

AI FACE ANALYSIS

02

Detect facial features and generate a unique biometric faces

DATABASE MATCHING

03

Compare against registered watchlists and identify databases.

REVEAL IDENTIFICATION

04

Display matched identity with confidence score and supporting information.

ACCURATE IDENTIFICATION, EVEN UNDER THE MOST CHALLENGING CONDITIONS.

FACE WITH MASK

CHILD PHOTO

IDENTIC TWIN

SEMI BLUR PHOTO

Cellular Analysis

Discover the current location of a target device.

ORGANIZE EVERY INVESTIGATION EFFICIENTLY

BENEFIT OF RESPOINT

ACCELERATE EVERY INVESTIGATION

Accelerate Identification

Instantly identify individuals using Face Recognition and Cellular Intelligence.

Improve Investigation Accuracy

Reduce manual effort with AI-powered identity verification and data correlation.

Unified Intelligence

Consolidate face recognition, cellular data, and case information in one platform.

Faster Operational Response

Enable rapid, data-driven decisions during security and law enforcement operations.

Enhanced Collaboration

Share cases and investigation data seamlessly across operational teams.
